

# Domsjö Fiber

# Our owners

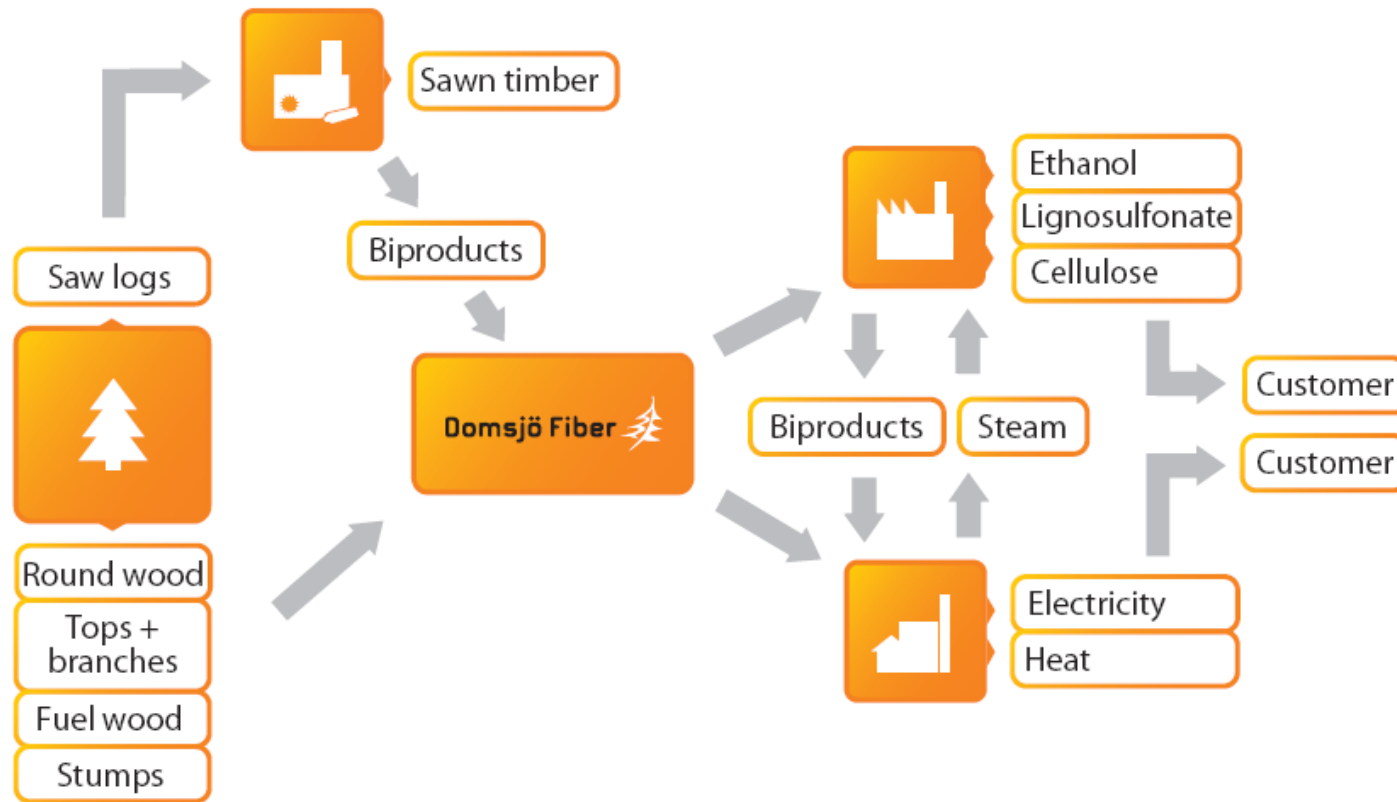

- Electricity
- District heating
- Broadband
- District cooling

- Special cellulose
- Ethanol
- Lignosulfonate

# Raw material optimization

We make more from the tree.

# VMF

- The first wood measuring organisation in Sweden was established in 1892
- In 1934 it was a law saying that buyers and sellers shall be equally represented in the boards of the measuring organisations

# Why VMF?

To create a stabile, trustworthy and transparent market situation

- More wood on the market
- Makes it easier to swop volumes between forest companies

*"You shall not compete with measuring"*

Business agreement

Harvesting

Measuring order

Transportation

- Distance
- Route planning

Measuring

- Volume, weight and quality

Data handling

Domsjö Fiber business system

- At our measuring station we measure m<sup>3</sup>, ton and MWh by taking size of the bundle, weight of the whole cargo and dryness on fuel assortments.
- Wood from our daughter company in Latvia is measured in Latvia.
- All data is sent to SDC and is available for all parties.
